

# MARKING system

Simply easy!

# MARKING system

## Simply easy!

We simplify your daily work – this is the promise backing every industrial marking and identification solution from Phoenix Contact. The MARKING system portfolio offers intuitive and user-friendly solutions for every application, from planning right through to the finished marking.

### Your advantages

- ✓ Everything from a single source, from planning right through to the finished marking
- ✓ High-quality results in no time, thanks to perfectly coordinated components
- ✓ Time savings, thanks to the rapid integration of our software and devices into your existing structures

### Printers

Whether laser markers, high-speed UV LED printers, or thermal transfer printers: all of these systems operate using a uniform user-friendly operating menu that provides you with intuitive support as you create your marking.

### Services

Expert support for every issue – by e-mail, phone, or directly on site. We stand ready to assist you at any time with services that are tailored to your individual needs.

## Software

Easily plan your terminal strips using the PROJECT complete software, and create the corresponding markings in one work operation.

## Material

The MARKING system covers every application with a wide variety of marking materials. Numerous versions are available for marking terminals, conductors and cables, devices, and systems to cater for any requirement.

THERMOMARK PRIME

# Planning and marking software – The terminal strip made simple

Intuitive configuration, intelligent functions, and a flexible user interface: the PROJECT complete software is currently the most innovative solution for easily planning your terminal strips, and for straightforward creation of the corresponding marking.

## Your advantages

- ✓ Perfect CAE integration, thanks to optimized interfaces to all standard software solutions
- ✓ Intuitive operation with auto-correction, speed marking, and the 3D visualization of your project
- ✓ Immediate control of all Phoenix Contact printing systems, thanks to Plug and Print functionality
- ✓ Suitable markings with a large selection of various materials, signs, symbols, characters, and templates

### Intuitive planning

Control cabinet planning made easier than ever: PROJECT complete automates the process of importing data from electrical planning, of bridging, marking, and correcting your terminal strip, and presents the result in 3D.

### Individual marking

Create markings easily and conveniently for the widest variety of marking applications. PROJECT complete imports existing data directly from your CAE systems and spreadsheet and word processing programs.

### Order in real time

Order your finished projects online immediately. PROJECT complete transmits the parts list to the Internet, meaning that you do not lose any valuable time in the delivery of your terminal strip.

# Marking and printing systems – Intuitive solutions for every demand

The right printing system is available for all of your marking needs. The BLUEMARK ID devices, with innovative UV LED technology, process resistant markings in no time. The TOPMARK NEO creates extremely robust laser markings to meet even your most stringent demands. Our various thermal transfer printers efficiently process materials in roll, card, and sheet format for all of your applications.

## Your advantages

- ✓ Easy operation and intuitive menu navigation, thanks to integrated touch displays
- ✓ Suitable printing and marking systems for all of your applications
- ✓ Marking directly in the field, thanks to our mobile printing systems
- ✓ One uniform software suite for all Phoenix Contact marking and printing systems

### Flexible color printer

The BLUEMARK ID COLOR is a powerful CMYK printer. Thanks to the innovative UV printing method, the high-quality markings can be used immediately.

### Efficient laser marker

With compact dimensions and easy operation, the TOPMARK NEO enables efficient industrial identification of the highest quality. At the same time, it processes more than 250 signs per minute.

### Mobile thermal transfer printer

The THERMOMARK PRIME is your transportable, mobile marking center. Touchscreen, capsule ink ribbons, and a replaceable rechargeable battery ensure that the printer is easy to operate directly on site.

# Marking material for every application – Versatile and precise

With our marking systems, you can mark individual components through to the entire system permanently and in compliance with standards. This will demonstrate your high quality standards. Our marking materials, ideally matched to your application, ensure sustainable safety and clarity. Their individual fit and high resistance guarantee durability, even against extreme environmental influences.

## Your advantages

- ✓ Comprehensive selection of materials for marking terminals, conductors and cables, devices, and systems
- ✓ Flexible use in every environment, thanks to numerous materials and mounting methods
- ✓ Durability, thanks to exceptional resistance to environmental influences

### Unique variety

Get markings for all of your applications from a single source. Materials, marking, and printing technologies for all ambient conditions are available for all of your marking applications.

### Flexible use

Whether screwing, riveting, latching, or with adhesives – all methods for affixing your markings are covered.

### Exceptional quality

Phoenix Contact marking materials withstand even the most extreme environmental influences. The high quality of our products has been proven in a multitude of tests in accordance with internationally recognized standards and directives.

## Tailored services – Expert partner for marking

As a system provider for industrial marking, we will create holistic individual solutions that are ideally tailored to your needs. We will provide comprehensive support and expert advice in integrating the MARKING system into your working routine, and also in use on site. Naturally, we are also available for fast and straightforward help – with services that simplify your work.

## Your advantages

- ✓ Everything from a single source: Phoenix Contact covers your individual system solution
- ✓ Targeted support from our expert Service employees
- ✓ Low time expenditure, thanks to short processing times and straightforward assistance directly on site
- ✓ Durable, sustainable solutions, thanks to professional maintenance concepts and permanent parts availability

### Always there for you

Whether by telephone or e-mail – we will deal with any issues that you have quickly and expertly. Our contacts' comprehensive know-how ensures that you receive professional support.

### Perfect start guaranteed

We will provide you with the ideal training for using our products and will set your individual system up perfectly for you.

### Quickly on site when needed

If you need our support, we will be there for you. We will be glad to help you, whether with maintenance work, repairs, or the short-notice replacement of devices.

## In dialog with customers and partners worldwide

Phoenix Contact is a globally present, Germany-based market leader. Our group is synonym for future-oriented components, systems, and solutions in the fields of electrical engineering, electronics, and automation. A global network across more than 100 countries, and 16,500 employees ensure a close proximity to our customers, which we believe is particularly important.

The wide variety of our innovative products makes it easy for our customers to find future-oriented solutions for different applications and industries. We especially focus on the fields of energy, infrastructure, process and factory automation.
